SLC, UT 84114-5610
538-5535

1. Administering State Agency <u>Division of Oil, Gas and Mining</u>	2. Approximate date project will start: <u>Expanding an existing small mining operation (<5 acres) to a large mining operation.</u>
3. Areawide clearinghouse(s) receiving state action: (to be sent out by agency in block 1) Bear River Association of Governments Roger Jones, Executive Director 170 North Main, Room 2 Logan, UT 84321	
4. Type of action: / / Lease / <input checked="" type="checkbox"/> / Permit / / License / / Land Acquisition / / Land Sale / / Land Exchange / / Other _____	
5. Title of proposed action: <u>Green Peak Mine – M/003/060 – I & P Investments</u>	
6. Description: During Operations: <u>All available soil materials will be salvaged prior to quarry operations and stockpiled for use during reclamation. A hydraulic excavator will be used to extract the stone from the quarry and load it on trucks to haul to the mill area to be split, sorted and prepared for market. Waste materials will be hauled to the waste rock dump area. Mining will be conducted in two phases, with each phase removing about 15 feet of material over the quarry area. Near the end of phase one (approximately two years), the waste rock dump will be of sufficient size that the operations at the mill site will be moved to the waste rock dump area. The mill site will then be reclaimed. Infrequent blasting may occur and will follow a MSHA approved blasting plan. Stone is split by hand to uniform size and stacked on pallets for shipping. Unusable material is placed on the waste dump. When sufficient areas are quarried out, waste materials will be left at the quarry location. If market conditions warrant, crushed and/or tumbled materials will also be sold. Dust will be controlled on the site and roads by using gravel and/or water. Equipment includes a D-8 bulldozer, three trackhoes, one water truck, ten haul trucks and a 45kw generator.</u> After Operations: <u>The mill area will be reclaimed when there is sufficient area on the waste rock dump area to prepare rock for market (approximately two years). The mill area will then be recontoured with soil material added at a 6" depth and 10 tons per acre of composted manure or biosolids will be applied. The area will then be ripped to a two-foot depth and seeded with the approved seed mix. A berm of rock will be left along the road to protect the reclaimed area.</u> <u>At the end of mine life, the quarry will be recontoured to approximately 4v:1h slopes. The waste rock dump slopes will be regraded and contoured to 3v:1h slopes. Soil materials will be placed on the regraded areas at an average depth of six inches. Composted manure or biosolids will be applied at a rate of ten tons per acre. The areas will then be ripped to a depth of two feet. An approved seed mix will be used to re-establish vegetation to support the post mining land use of grazing and wildlife habitat. The access road from Star Stone Quarries, Inc.'s Rosebud quarry to the Green Peak will be regraded to approximate original contours and seeded with the approved seed mix. Road sections not needing regrading will be ripped to a two-foot depth to eliminate compaction and seeded. The area will be monitored for noxious weeds, and appropriate weed control measures will be implemented as required.</u>	

<p>7. Land affected (site location map required) (indicate county) – include UTM coordinates where possible. <u>Portions of: the SE 1/4 of the SW 1/4 of Section 11; the N 1/2 of the NE 1/4 of the NW 1/4 and the SW 1/4 of the SE 1/4 of the SE 1/4 of Section 14; and the N 1/2 of the NE 1/4 of the NE 1/4 of Section 23; Township 10 North, Range 16 West, SLBM. The access road is located within sections 11 and 14.</u> <u>UTM: 279,260 E 4,608,438 N</u></p>	
<p>8. Jordan River Natural Areas Forum review – If the proposed action affects lands within the Jordan River Natural Areas Corridor. (to be sent out by agency in block 1. (see Instructions II below). <u>N/A</u></p>	
<p>9. Has the local government(s) been contacted? <u>Yes</u> If yes, a. How was contact made? <u>By copy of this public notice</u> b. Who was contacted? <u>Luann Adams, Box Elder County Planning and Zoning</u> c. What was the response? <u>None to date</u> d. If no response, how is the local government(s) likely to be impacted? <u>No impact likely.</u></p>	
<p>10. Possible significant impacts likely to occur: <u>None</u></p>	
<p>11. Name and phone of district representative from your agency near project site, if applicable: <u>N/A</u></p>	
<p>12. For further information, contact: <u>Lynn Kunzler, Senior Reclamation Biologist</u> Phone: <u>(801) 538-5310</u></p>	<p>13. Signature and title of authorized officer  Date: <u>4/1/05</u> <u>Permit Supervisor</u></p>

INSTRUCTIONS

I. Whenever a State agency proposes or is administratively responsible for an action not exempted, it shall complete a State Action form and forward one copy to the Governor's Office of Planning and Budget and the effected areawide clearinghouse(s). All State Actions reviewed by the Resource Development Coordinating Committee (RDCC) within 30 days of receipt will forward all comments and recommendations within the 30-day review period to the initiating State agency. State Agencies may request an extension to the 30-day review period, if additional information is needed.

Questions encountered with the areawide clearinghouse review should be directed to the areawide clearinghouse. The Governor's Office of Planning and Budget will wait for the affected areawide clearinghouse(s) to complete their review before issuing a final clearance to the originator on this STATE ACTION.

II. If the proposed action affects lands within the Jordan River Natural Conservation Corridor (see **Error! Not a valid link.**), a copy of this completed form must also be submitted to:

Jordan River Natural Areas Forum
C/O State and Local Planning
Governor's Office of Planning and Budget
116 State Capitol
Salt Lake City, UT 84114

Questions regarding JRNACC or JRNAF should be directed to 538-1027.
